-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This case has been reassigned to a new Examiner.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/17/05 has been entered.

Response to Arguments

3. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Art Unit: 2145

7. It is unclear in claims 1, 4, and 5 if the claim is stating that the monitoring of the connection monitoring unit causes the result of abnormally cutting off the connection, or if the monitoring detects an abnormal cut off of the connection.

8. Claim 2 has a grammatical error in "...*determines that the connection has been is normally released...*" which needs correction/clarification.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Donahue et al. (U.S. Patent No. 5,835,721).

11. In regard to claims 1, 4 and 5, Donahue disclosed *a reply unit configured to transmit reply information corresponding to a request issued by the external device, and to store the reply information in a memory; a connection monitoring unit configured to monitor a connection between the data communication device and the external communication device, the connection for transmitting the reply information from the reply unit; and a transmission unit configured to transmit the reply information corresponding to the connection stored in said memory to said external communication device if the transmission unit determines that the connection has been abnormally cut off based on a result of the monitoring by said connection monitoring unit.* See Donahue, column 1, line 57 – column 2, line 9; column 6, lines 19-35; column 6, lines 51-65; column 7, lines 1-35.

12. In regard to claim 2, Donahue further disclosed *a reply information destruction unit which destroys the reply information stored in said memory if the reply information destruction unit determines that the connection has been is normally released based on the result of the monitoring by said connection monitoring unit.* See Donahue, column 10, lines 12-15.

Art Unit: 2145

13. In regard to claim 3, Donahue further disclosed *the reply information includes identification information for identifying the request*. See Donahue, column 8, lines 1-19.
